WHAT IS NETFLEET?

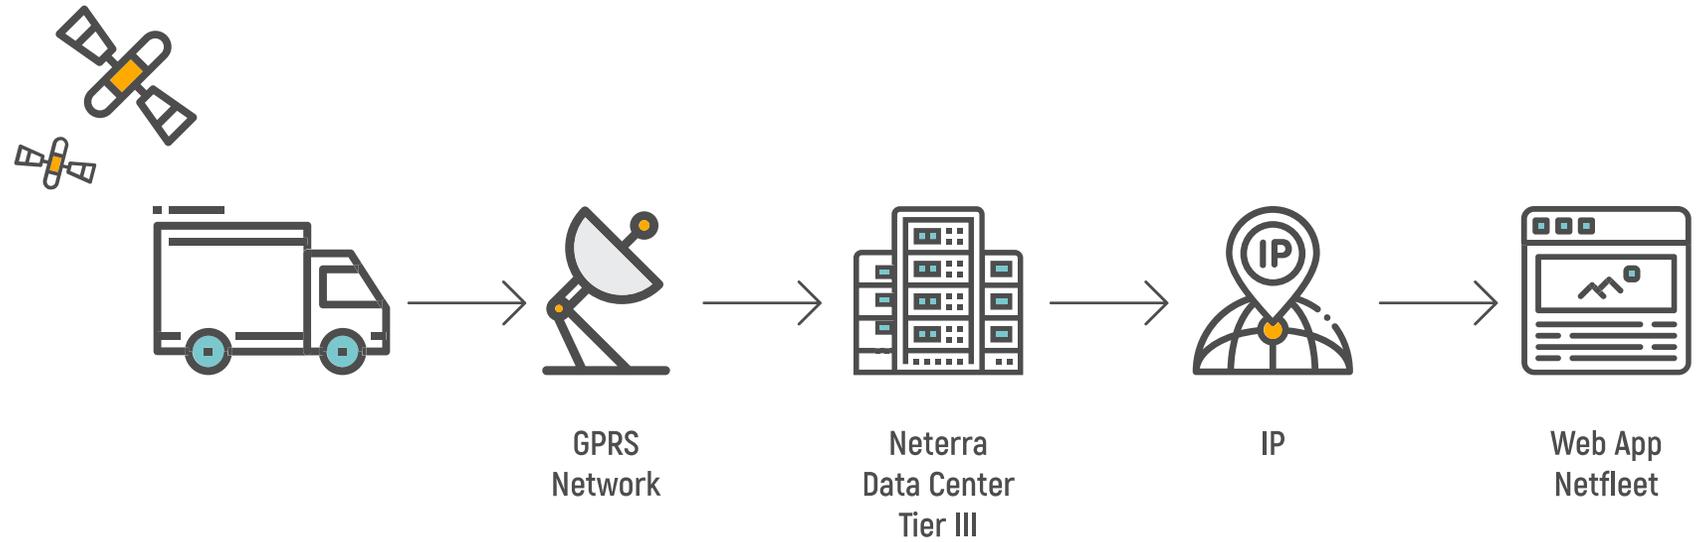

GPS platform

for control and management of mobile and stationary objects and cost optimization.

PRINCIPLES OF HOW WE OPERATE

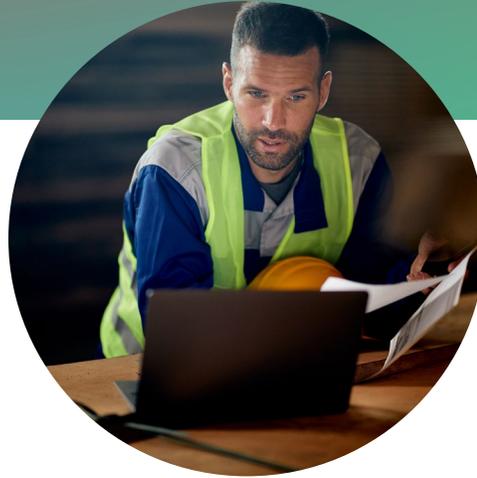

OUR MESSAGES

TRACK

- Everywhere in the world!
- Through every web access device!
- Easy-to-use system!

ANALYZE

- With convenient work reports in tabular and graph form

OPTIMIZE

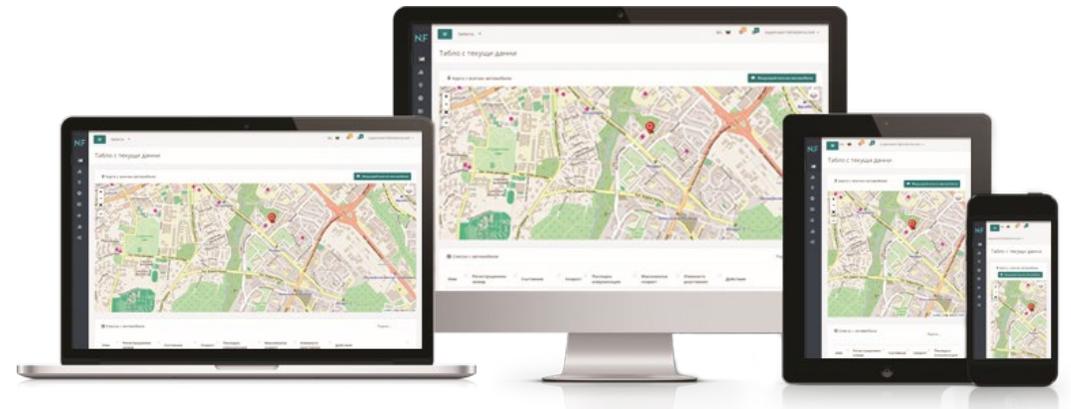

- Fuel costs
- Usage costs
- Working hours of your employees
- Complete organization of your vehicle fleet

EASY-TO-USE SYSTEM

THE SERVICE

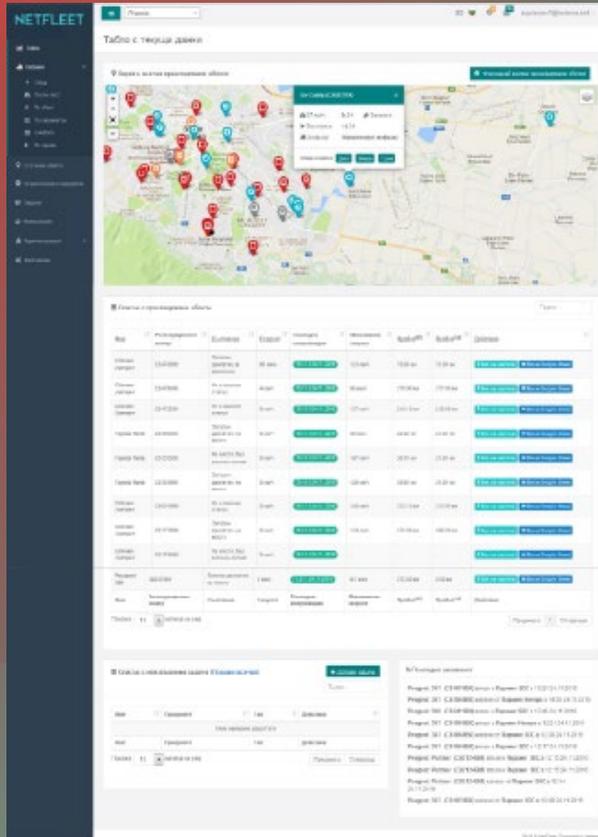

- Using a web browser, our high-tech GPS/GPRS solution allows tracking of vehicles and other mobile objects in real time and past periods.
- You will be able to remotely monitor and check the positions of your items through a set of maps and analyze a large number of parameters using the tables and graphs provided.
- By working with one of the largest companies in the public and private sectors, we have been able to achieve high efficiency and greater security for them.
- The service encompasses multiple parameters, covering the entire spectrum of what consumers want.

BASIC FUNCTIONALITY

Basic parameters

- Track location
- Speed and direction of movement
- Date and time
- Vehicle status:
 - Starting place
 - Indication of movement
 - Engine off
- Fuel level in the tank by factory sensor (if available)
- Detailed routes and zones with places stopped and precise addresses

Continues...

BASIC FUNCTIONALITY

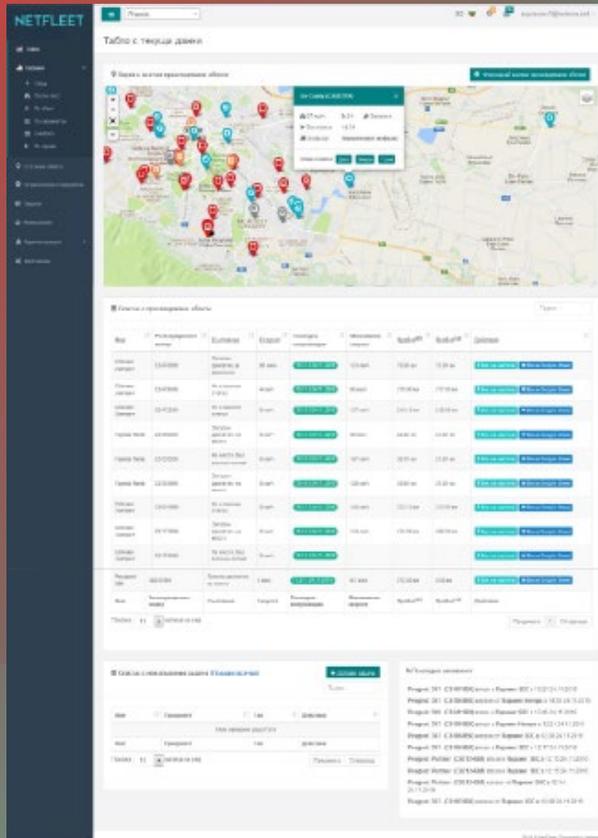

Basic parameters

- Real-time and up-to-date reports with date and time stamps
- Limits and alerts of speed when leaving a geographical area
- Reporting of work, stopping and sites visited
- Entry, staying in and exiting predefined zones
- Working in and out of working hours

NEW!

Automatic information related to "weekend tax" reporting

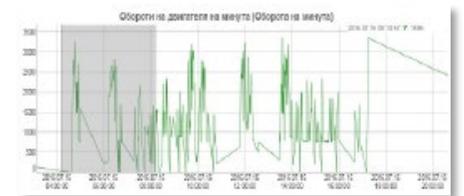

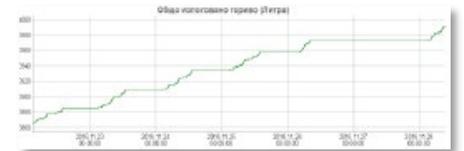

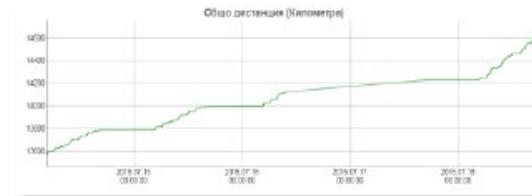

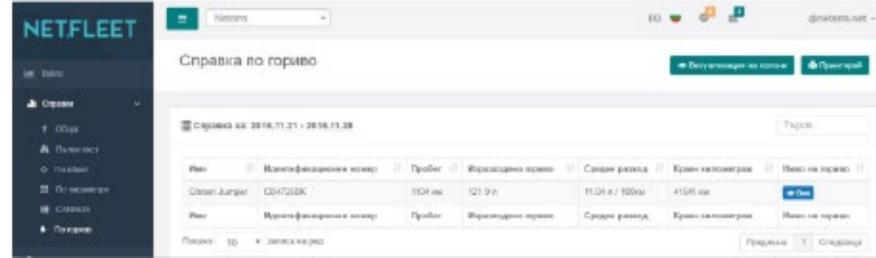

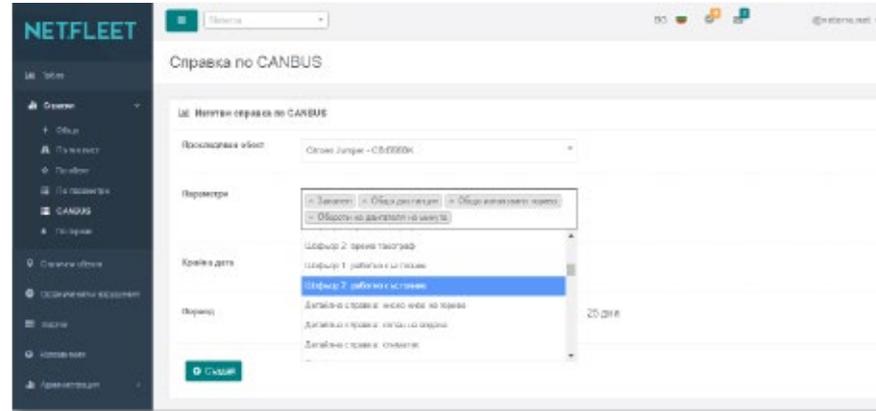

- Alert for upcoming technical maintenance and service
- Detailed electronic waybill among others...

EXTENDED FUNCTIONALITY

Includes everything from basic functionality + vehicle Data

- Precise amount of fuel used
- Engine speeds
- Fuel level in the tank
- Frequency of brake application and rapid acceleration
- And more than **40 checks**

ADDITIONAL OPTIONS

Driver identification

Convenient and easy to control and manage by personalizing drivers in vehicles and reporting on working time.

Detectors and sensors

The possibility of using additional detectors or sensors for fuel, temperature, door, hatch, connection to alarm system, panic button, flow meter, etc.

Other technological and individual solutions

Including for agricultural producers, specialized machinery, transport schedules, navigation and text communication with the driver, hardware and software development, and much more.

OUR OFFER

What you get

- Personal profile and the possibility of different levels of access
- User and/or administrator rights, with full account management capability
- Installation of technical equipment in motor vehicles
- Technical Support
- Upgrading of the NetFleet platform - you will receive all new updates for free
- Training to work with the platform

What you pay for

- Equipment
- Installation of equipment
- Monthly subscription (includes maintenance, service and GPRS traffic)

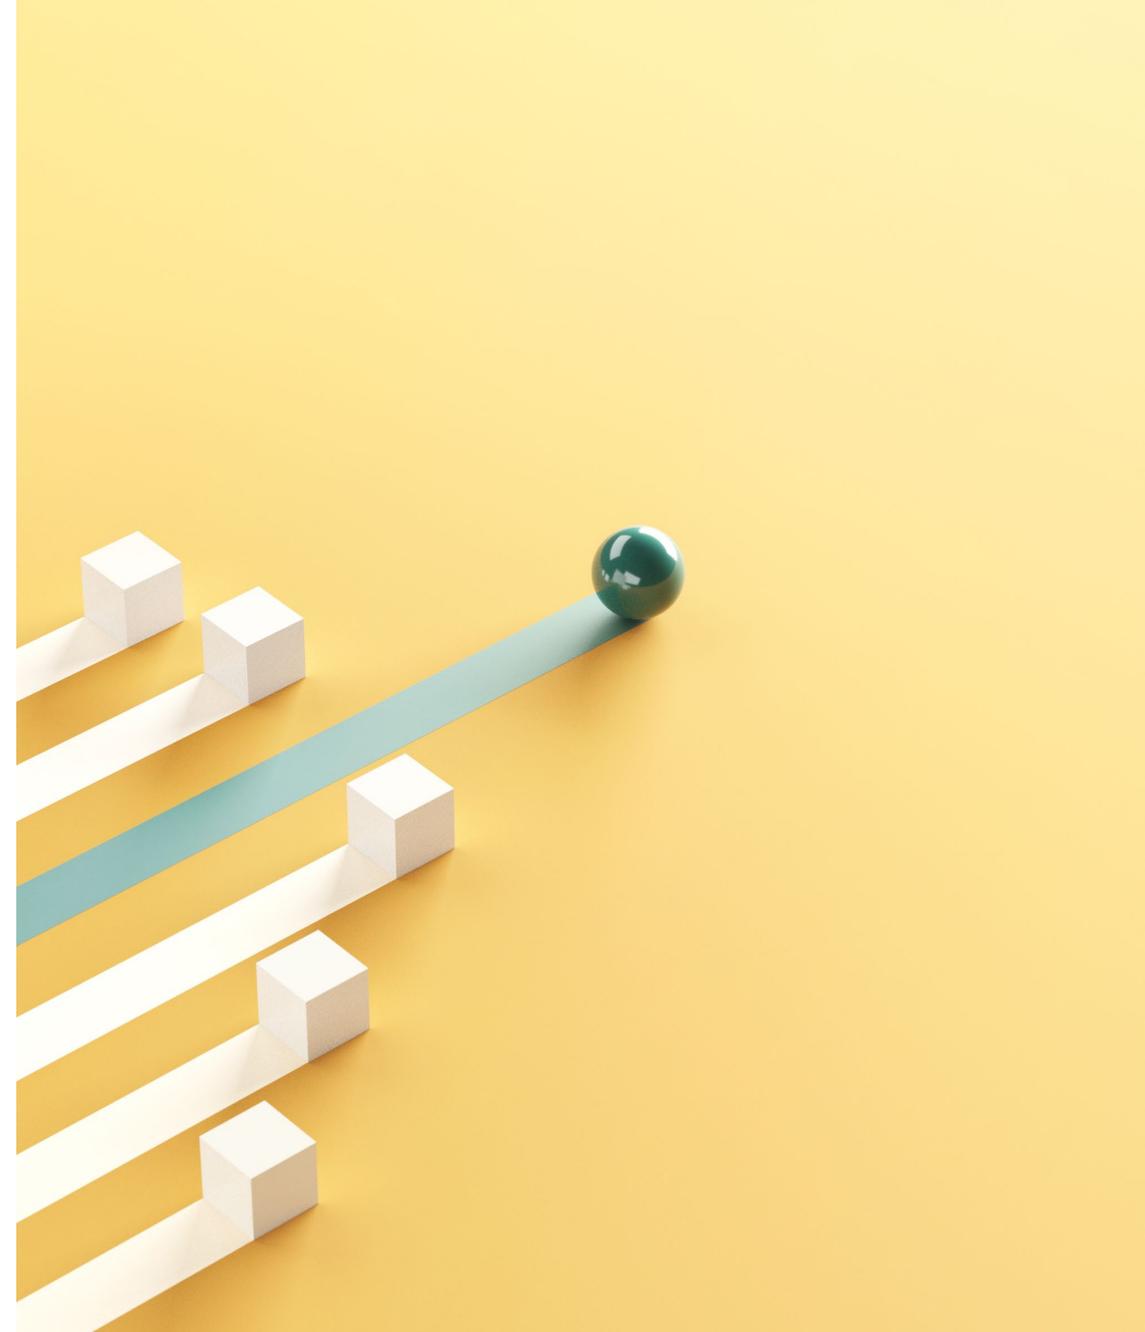

YOUR BENEFITS

- **Control** in real time and **always** know where the vehicle is [2 meters deviation]
- **Prevention** of theft
- More **security** for you, your relatives or employees
- You **save** on vehicle costs
 - Control over fuel consumption
 - Reducing abuse
 - Optimize routes and speed
 - Minimize overall operating costs
- **Significantly increase** efficiency in organizing work
- You **increase driving discipline** and much more

OUR ADVANTAGES

- **Personal** attitude to customers
- Individual/**custom solutions**
- **Flexible system** with optimization and introduction of new services and functionalities
- Easy to use - **intuitive** system
- **Reporting** fuel consumption and other vehicle parameters in real time
- Generate all available **reports** from data **on the vehicle's computer**
- Reporting of work in and out of **working hours**
- **Reporting visits** to and time spent in a predefined place/zone
- **Web access** from anywhere in the world
- Guaranteed **security of information** and data transfer
- Servers are located in our own **Class 1 Data Centers**
- Ability to use a **package of different telecommunication services** offered by Neterra

WHO ARE WE

- Neterra is a global telecom operator providing complex services around the world for more than 27 years.
- Neterra has its own network for data transmission, TV and voice connected through its partners with networks all over the world.
- Neterra is known for its focus on quality of service. The company's data network is in the top 100 on global internet networks and is traditionally number one in Southeast Europe.
- More information about Neterra can be found at neterra.net
